

SYSTEM, METHOD AND STORAGE MEDIUM FOR GENERATING A
COMMISSION LINK

ABSTRACT OF THE DISCLOSURE

An exemplary embodiment is a system, method and storage medium for generating a commission link. The system includes an affiliate host system for presenting a user with a link to a first location having a corresponding coded link to a second location, receiving an input based on the user's selection of the link to the first location, connecting the user to the second location, connecting the user to the first location after a selected period at the second location and receiving a commission based on connecting the user to the second location. A network is coupled to the affiliate host system, and an affiliate database is couple to the affiliate host system.
